Donna Parker hoped the joint meeting tonight of the Town Council and Board of Health (BOH) discussed the phasing of the sewer project. She wondered how the project phasing would affect residents who had Title 5 septic which had failed.

Susan Rohrbach felt it was excellent to see the collaboration between Vineyard Wind and the town. She mentioned the town was struggling with water issues for decades.

Response to Public Comment:

(Bogan) explained there would be discussion regarding the phasing of which areas were getting sewer or not sewer. The discussion would also address the accommodations for those that are getting sewer later within the 30 year phasing.

(Hebert) There are lots of questions regarding the sewer. Broad based the sewer could affect 11,000 residents. He added the Town and Staff needed to work together to get the information out to the general public.

PRESENT: (On Zoom) Donald Guadagnoli, MD., Thomas Lee, Daniel Luczkow, MD., John Norman, Chair. Thomas McKean, Director of Public Health and Sharon Crocker, Administrative Assistant, were also present.

Mark Ells discussed the communication between the BOH and the Town Council. The discussions centered on the CWMP with updates and coordinated efforts. He spoke about the nitrogen sensitive areas of the Town and use of innovative onsite systems (IA). Dan Santos, Director of Public Works gave an update on the CWMP. He spoke about the Massachusetts Environmental Protection Agency (MEPA) and Cape Cod Commission fully approving of the CWMP plan. He discussed the State Revolving Funds (SPF) 2021 which the town had submitted all projects in order to receive funding. He added the negotiations with Joint Cape Cod Base project were still ongoing. He commented on the 19 projects over the 30 years which would be based in the center of Barnstable. He affirmed the upcoming projects: Strawberry Hill Road sewer expansion project costing \$11.7 million dollars / Craigville Beach Road which would start September 20, 2021; Duct bank and substation with an offshore transmission cable installation at Covell Beach. He noted the project construction was anticipated to be completed in spring 2023. He added the Route 28 East Sewer Expansion costing \$22 million dollars which was approved for SPF funding at the June Council meeting.

Dan Santos discussed other sewer expansion projects: Phinney's lane/ Long Pond – pump station at Mother's Park; Route 28 Centerville/Marstons Mills – survey work already completed. He utilized a PowerPoint presentation to give an overview of the sewer expansion project. He noted the Route 28/ Yarmouth Road was a Massachusetts Department of Transportation (MASSDOT) project in which sewer and water infrastructure would be installed as part of their project. MASSDOT has bid the project out and this will save the town money on our project. He explained the Evaluation of Nitrogen Removal Improvements at the Barnstable Water Pollution Control Request for Proposals has been issued to the public. He said the Department of Environmental Protection has meet with BOH and the Building Commissioner/ Department. Properties will be required to connect to sewer and will look at each property individually. Residents will need to understand the requirement to connect as the Town must reach a level to reduce the nitrogen levels. The

Town needs to meet the standards for clean water. The Town is also looking at the phasing and what to do with current septic tanks. The Town and all its departments must work together to update the citizens. BOH Chair John Norman explained he is working closely with the Department of Environmental Protection (DEP). Each property subject to the sewer connection will be looked at and will work with Legal regarding those that do not want to hook up to sewer.

(Cullum) Is the BOH going to civic association meetings with the councilor? Great teamwork would be helpful for residents to understand the need for the sewer project. (Rapp Grasseti) wondered about addition workshop for Phase I/II and Phase III as well as discussion regarding the use of IA systems to help reduce the nitrogen levels. She had concerns with the onsite systems and residents who will not have a sewer connections. (Dagwan) This is a tough job does the BOH need more people on their board? Would it be beneficial to the board to have more members? (Norman) Yes, we would welcome a bigger committee with a three-member board one has to be very careful to avoid conversations outside a meeting – there cannot be a two-person conversation. (Neary) Nitrogen reduction project is costly we must require residents to connect to sewer. (Bogan) This is a tough love situation but we can still be compassionate in extreme circumstances it is the only way this works. (Rapp Grasseti) will place enlarging the BOH on the Appointments Committee agenda. Will take a look at an increase to a 5-member board.

(Norman) Open up to questions from the BOH. (Lee) This is not a simple matter must look at all cases and solve the issues. The Nitrogen E Systems are very important.

Close this portion of the meeting BOH is not adjourned at this time as open meeting is still going on,
