Year 6 Annual Report Massachusetts Small MS4 General Permit

Reporting Period: July 1, 2023-June 30, 2024

Please DO NOT attach any documents to this form. Instead, attach all requested documents to an email when submitting the form. Also ensure any websites included on this form are to publicly accessible sites

Unless otherwise noted, all fields are required to be filled out. If a field is left blank, it will be assumed the requirement or task has not been completed. Please ONLY report on activities between July 1, 2023 and June 30, 2024 unless otherwise requested.

✓ O&M programs for all permittee owned facilities have been completed and updated as necessary	
Implemented all maintenance procedures for permittee owned facilities in accordance with O&M programs	
 Implemented program for MS4 infrastructure maintenance to reduce the discharge of pollutants Inspected all permittee owned treatment structures (excluding catch basins) 	
Optional: If you would like to describe progress made on any incomplete requirements listed above or providany additional details, please use the box below:	e
Bacteria/ Pathogens (Combination of Impaired Waters Requirements and TMDL Requirements as Applicabl Annual Requirements	e)
Public Education and Outreach*	
Annual message was distributed encouraging the proper management of pet waste, including noting an existing ordinances where appropriate	у
Permittee or its agents disseminated educational material to dog owners at the time of issuance or renewal of dog license, or other appropriate time	
Provided information to owners of septic systems about proper maintenance in any catchment that discharges to a water body impaired for bacteria	
☐ This is not applicable because there are no septic systems present	
* Public education messages can be combined with other public education requirements as applicable (se Appendix H and F for more information)	'e
Optional: If you would like to describe progress made on any incomplete requirements listed above or providany additional details, please use the box below:	e
Public Education - The Town is a member of the statewide ThinkBlue campaign which provides extensive public education messages to various target audiences. Additionally, the Town makes Mutt Mitt pet waste dispensers available at locations frequented by dog walkers.	+
Nitrogen (Combination of Impaired Waters Requirements and TMDL Requirements as Applicable)	
1 D 1	

Annual Requirements

Public Education and Outreach*

- Distributed an annual message in the spring (April/May) that encourages the proper use and disposal of grass clippings and encourages the proper use of slow-release fertilizers
- Distributed an annual message in the summer (June/July) encouraging the proper management of pet waste, including noting any existing ordinances where appropriate
- Distributed an annual message in the fall (August/September/October) encouraging the proper disposal of leaf litter
- * Public education messages can be combined with other public education requirements as applicable (see Appendix H and F for more information)

Good Housekeeping and Pollution Prevention for Permittee Owned Operations

Town of Barnstable Page Increased street sweeping frequency of all municipal owned streets and parking lots subject to Permit part 2.3.7.a.iii.(c) to a minimum of two times per year (spring and fall) Structural BMPs Installed a structural BMP as a demonstration project within the drainage area of the water quality limited water or its tributaries. The type of BMP installed is (e.g. biofiltration): Any structural BMPs listed in Attachment 3 to Appendix F already existing or installed in the regulated area by the permittee or its agents was tracked and the nitrogen removal by the BMP was estimated consistent with Attachment 3 to Appendix F. The BMP type, total area treated by the BMP, the design storage volume of the BMP, and the estimated nitrogen removed in mass per year by the BMP were documented. O No BMPs were installed • The above referenced BMP information is attached to the email submission The above referenced BMP information can be found at the following publicly available website: Total estimated nitrogen removed in lbs/year from the installed BMPs: 3.80000000

Optional: If you would like to describe progress made on any incomplete requirements listed above or provide any additional details, please use the box below:

Street Sweeping - The Town swept a total of 927 miles of roads this year, of which 65 miles are located within MS4-regulated catchment areas. All main roads are swept once a year and the Town did 5 of 56 secondary roads. In addition to contracted street sweeping, the Town completed periodic sweeping using in-house resources on an as-needed basis in high priority areas.

Nitrogen Source Identification Report - It is assumed that all waterbodies currently listed as impaired for total nitrogen or estuarine bioassessments will eventually be covered under the Cape Cod Nitrogen TMDL or similar document. As currently written, this document largely identifies wastewater as the primary cause of nitrogen pollution rather than stormwater and exempts communities from completing the Nitrogen Source Identification Report, as well as the accompanying BMP evaluation and construction of a stormwater demonstration BMP. Thus, the Town is not currently planning on completing these requirements. Remaining items outlined above as required are being completed according to the schedule outlined in the permit.

Phosphorus (Combination of Impaired Waters Requirements and TMDL Requirements as Applicable)

Annual Requirements

Public Education and Outreach*

- Distributed an annual message in the spring (April/May) encouraging the proper use and disposal of grass clippings and encouraging the proper use of slow-release and phosphorus-free fertilizers
- Distributed an annual message in the summer (June/July) encouraging the proper management of pet waste, including noting any existing ordinances where appropriate
- Distributed an annual message in the fall (August/September/October) encouraging the proper disposal of leaf litter

Town of Barnstable Page * Public education messages can be combined with other public education requirements as applicable (see *Appendix H and F for more information)* Good Housekeeping and Pollution Prevention for Permittee Owned Operations Increased street sweeping frequency of all municipal owned streets and parking lots subject to Permit part 2.3.7.a.iii.(c) to a minimum of two times per year (spring and fall) Structural BMPs Installed a structural BMP as a demonstration project within the drainage area of the water quality limited water or its tributaries. The type of BMP installed is (e.g. biofiltration): Lovells Pond Boat Ramp - An existing structure near the Lovells Pond boat ramp was removed, resulting in removal of approximately 220 square feet of directly connected impervious surface. This area was retrofitted with native plantings and receives runoff from approximately 600 square feet of the boat ramp area. Total pollutant removals are estimated at 0.03 pounds of annual phosphorus reduction. This area serves as the required public demonstration project within the Lovells Pond Any structural BMPs already existing or installed in the regulated area by the permittee or its agents was tracked and the phosphorus removal by the BMP was estimated consistent with Attachment 3 to Appendix F. The BMP type, total area treated by the BMP, the design storage volume of the BMP, and the estimated phosphorus removed in mass per year by the BMP were documented. O No BMPs were installed • The above referenced BMP information is attached to the email submission The above referenced BMP information can be found at the following publicly available website: Total estimated phosphorus removed in **lbs/year** from the installed BMPs: 0.38000000 Optional: If you would like to describe progress made on any incomplete requirements listed above or provide any additional details, please use the box below: Street Sweeping - The Town swept a total of 927 miles of roads this year, of which 65 miles are located within MS4-regulated catchment areas. All main roads are swept once a year and the Town did 5 of 56 secondary roads. In addition to contracted street sweeping, the Town completed periodic sweeping using in-house resources on an as-needed basis in high priority areas. Public Education - The Town posted a seasonal message on proper lawn care and fertilizer application its website. In addition, the Town is a member of the statewide ThinkBlue campaign which provides extensive public education messages to various target audiences. Solids, Oil and Grease (Hydrocarbons), or Metals **Annual Requirements** Good Housekeeping and Pollution Prevention for Permittee Owned Operations Increased street sweeping frequency of all municipal owned streets and parking lots to a schedule that targets areas with potential for high pollutant loads O The street sweeping schedule is attached to the email submission

• The street sweeping schedule can be found at the following publicly available website:

Included as an appendix in the SWMP Plan, available for download at: https://www.town.barnstable.ma.us/Departments/PublicWorks/Projects and Updates/MS4+

Prioritized inspection and maintenance for catch basins to ensure that no sump shall be more than 50 percent full; Cleaned catch basins more frequently if inspection and maintenance activities indicated excessive sediment or debris loadings

Optional: If you would like to describe progress made on any incomplete requirements listed above or provide any additional details, please use the box below:

Street Sweeping - The Town swept a total of 927 miles of roads this year, of which 65 miles are located within MS4-regulated catchment areas. All main roads are swept once a year and the Town did 5 of 56 secondary roads. In addition to contracted street sweeping, the Town completed periodic sweeping using in-house resources on an as-needed basis in high priority areas.

Increased Sweeping for High Pollutant Loads - This was determined not to be necessary for the Town as these areas are not observed to accumulate more sediment and debris than other areas within the Town.

Part III: Receiving Waters/Impaired Waters/TMDL

Have you made any	changes to your	lists of receiving	waters, outfalls,	or impairments	since the NOI was
submitted?					
_					

YesNo

If yes, describe below, including any relevant impairments or TMDLs:

The Town has determined it is subject to the following additional TMDL and Impaired Waters requirements:

- -Centerville Harbor (MA96-03), estuarine bioassessments or nutrient/eutrophication biological indicators (Appendix H, Part I)
- -Hyannis Harbor (MA96-05), estuarine bioassessments or nutrient/eutrophication biological indicators (Appendix H, Part I)
- -Lewis Bay (MA96-36), estuarine bioassessments or nutrient/eutrophication biological indicators (Appendix H, Part I)
- -Maraspin Creek (MA96-06), estuarine bioassessments or nutrient/eutrophication biological indicators (Appendix H, Part I)
- -Little River (MA96-99), bacteria water quality impairments requirements (Appendix H, Part III)
- -Unnamed Tributary (MA96-100), bacteria water quality impairments requirements (Appendix H, Part III)

-Lovells Pond (MA96185), turbidity water quality impairments requirements (Appendix H, Part V)

Note, the Hyannis Harbor (MA96-05), fecal coliform impairment removed from 303(d) list

Part IV: Minimum Control Measures

Please fill out all of the metrics below. If applicable, include in the description who completed the task if completed by a third party.

MCM1: Public Education

Number of educational messages completed **during this reporting period**: 5.00000000

Below, report on the educational messages completed **during this reporting period**. For the measurable goal(s) please describe the method/measures used to assess the overall effectiveness of the educational program.

BMP: <i>Mutt Mitt Dis</i> Message Description	and Distribution Method:
Provide Mutt Mitt di pickup.	spensers and refills at public areas frequented by dog walkers to encourage pet waste
Targeted Audience:	Residents
Responsible Departm	nent/Parties: Recreation Department, Department of Public Works, Public Health Division
Measurable Goal(s):	
Maintain Mutt Mitt a problem locations as	lispensers at certain public areas frequented by dog walkers. Add additional dispensers at budget allows.
Message Date(s): Co	ntinuous / ongoing
Message Completed	for: Appendix F Requirements 🗹 Appendix H Requirements 🗹
Was this message dif	ferent than what was proposed in your NOI? Yes O No •
•	the change was made:
BMP: Social Media	
	and Distribution Method:
	ages for Leaf Litter, Dog Waste, Fertilizers, Septic Smart Tips, Stormwater 101, and ays on Facebook (13,000 followers) and Instagram (2,000 followers), as well as
	and barnstablewaterresources.com
Targeted Audience:	Residents and commercial
Responsible Departm	nent/Parties: Department of Public Works, Information Technology
Measurable Goal(s):	
	nessages during the permit year.
Message Date(s):	

Town of Barnstable Page Continuous / ongoing Message Completed for: Appendix F Requirements Appendix H Requirements Yes O No O Was this message different than what was proposed in your NOI? If yes, describe why the change was made: **BMP:** Seasonal Messages Message Description and Distribution Method: Developed 720 bookmarks for each seasonal message (Pet Waste, Leaf Litter, and Fertilizer) and distributed 120 bookmarks to each of the 6 libraries in Barnstable. Also, created 30 flyers for each seasonal message and distributed to the Adult Community Center and Town Hall. Targeted Audience: Residents, Businesses, Institutions, Commercial Facilities, Developers (construction) Responsible Department/Parties: Residents, Businesses, Institutions, Commercial Facilities, Developers (consti Measurable Goal(s): Distribute informational bookmarks and flyers at various Town buildings and facilities. Message Date(s): Continuous / Ongoing Appendix F Requirements Appendix H Requirements Message Completed for: Was this message different than what was proposed in your NOI? Yes O No O If yes, describe why the change was made: BMP: Barnstable Water Resources Websites Message Description and Distribution Method: Maintained a website with up to date information on topics that include stormwater and wastewater. Targeted Audience: Residents, Businesses, Institutions, Commercial Facilities, Developers (construction) Responsible Department/Parties: Department of Public Works, Information Technology Measurable Goal(s): Keep website updated with information at various times throughout the year.

Message Date(s): Continuous / Ongoing

Describe any other public involvement or participation opportunities conducted **during this reporting period**:

Pond Association Meetings - The Town attended three pond association meetings to discuss pond water

MCM3: Illicit Discharge Detection and Elimination (IDDE)

Sanitary Sewer Overflows (SSOs) Check off the box below if the statement is true.
☐ This SSO section is NOT applicable because we DO NOT have sanitary sewer
Below, report on the number of SSOs identified in the MS4 system and removed during this reporting period.
Number of SSOs identified: 0
Number of SSOs removed: 0
MS4 System Mapping
Percent of Phase II map complete: 95.00000000
Optional: Provide additional status information regarding your map:
Initial catchment delineations have also been completed based on topographic mapping and available stormwater system information, and are being refined as additional field information is collected during catchment investigations. The Town has also substantially mapped catch basins and manholes, and is working to complete mapping of piping connectivity. Mapping of open channel conveyances and interconnections with other MS4s (e.g. DOT) is ongoing, and it is expected that this will continue as part of DOT's own mapping efforts to be completed under a future TS4 permit. The Town is also working to identify data gaps in its drainage mapping (e.g., catch basins without piping, disconnected drainage networks, etc.) and is actively mapping and investigating these. Any new infrastructure discovered through this process will be mapped and screened as necessary by the end of Year 10.
Screening of Outfalls/Interconnections If conducted, please submit any outfall monitoring results from this reporting period. Outfall monitoring result should include the date, outfall/interconnection identifier, location, weather conditions at time of sampling, precipitation in previous 48 hours, field screening parameter results, and results from all analyses. Please also include the updated inventory and ranking of outfalls/interconnections based on monitoring results.
 No outfalls were inspected
The above referenced outfall screening data is attached to the email submission
The above referenced outfall screening data can be found at the following publicly available website:
Below, report on the number of outfalls/interconnections screened during this reporting period.
Number of outfalls screened: 0
Below, report on the percent of outfalls/interconnections screened to date.
Percent of outfalls screened: 70.00000
Optional: Provide additional information regarding your outfall/interconnection screening:

As/if additional outfalls are located, they are screened during dry weather for potential illicit discharges.

Catchm	ent	Inves	tiga	tions
Catchin	CHI	111 4 62	uza	uous

Catchment Inv	<u>vestigations</u>
If conducted, pl	lease submit all data collected during this reporting period as part of the dry and wet weather
_	Also include the presence or absence of System Vulnerability Factors for each catchment.
•	No catchment investigations were conducted
\circ	The catchment investigation data is attached to the email submission
\circ	The catchment investigation data can be found at the following publicly available website:
Below, report o	n the number of catchment investigations completed during this reporting period.
	Number of catchment investigations completed this reporting period: θ
Below, report o	n the percent of catchments investigated to date.
	Percent of total catchments investigated: 47.00000000
Optional: Prov	ide any additional information for clarity regarding the catchment investigations below:
IDDE Progress	
	ges were found, please submit a document describing work conducted over this reporting
·	nulative to date, including location source; description of the discharge; method of discovery;
date of discover schedule of rem	ry; and date of elimination, mitigation, or enforcement OR planned corrective measures and noval.
v	No illicit discharges were found
\circ	The illicit discharge removal report is attached to the email submission
	The illicit discharge removal report can be found at the following publicly available website:
	Note, illicit discharge reporting information is provided below.
Below, report o	n the number of illicit discharges identified and removed, along with the volume of sewage

removed during this reporting period.

Number of illicit discharges identified: 2.00000000 Number of illicit discharges removed: |2.00000000

Estimated volume of sewage removed: θ gallons/day

Below, report on the total number of illicit discharges identified and removed to date. At a minimum, report on the number of illicit discharges identified and removed since the effective date of the permit (July 1, 2018).

Total number of illicit discharges identified: 3.00000000

Total number of illicit discharges removed: |3.00000000

Optional: Provide any additional information for clarity regarding illicit discharges identified, removed, or planned to be removed below:

Illicit Discharges:

Construction debris from a granite company was observed being based into eatch basin on Corneration

Emi	ployee	Tra	ining	Ţ
	projec			

Describe the frequency and type of employee training conducted during this reporting period:

DPW held an IDDE training session on March 6, 2024 for all DPW staff to review stormwater maintenance activities, such as good housekeeping, operation and maintenance, inspections, identification of illicit discharges, and methods to ensure appropriate road salting, etc.

MCM4: Construction Site Stormwater Runoff Control

WICKIA. Constituction Site Stormwater Runoii Control
Below, report on the construction site plan reviews, inspections, and enforcement actions completed during this reporting period.
Number of site plan reviews completed: 37.0000000
Number of inspections completed: 3.00000000
Number of enforcement actions taken: 0
Optional: Enter any additional information relevant to construction site plan reviews, inspections, and enforcement actions:

MCM5: Post-Construction Stormwater Management in New Development and Redevelopment

Ordinance or Regulatory Mechanism

Date update was completed (due in year 3): N/A, not yet adopted

Date update was completed (due in year 3): [N/A, not yet adopted

The Town adopted a Stormwater Management and Illicit Discharge ordinance on April 4, 2024. The stormwater ordinance is posted at

Website of ordinance or regulatory mechanism:

https://www.townofbarnstable.us/Departments/PublicWorks/Projects_and_Updates/Stormwater-Management-Regulations.asp and will soon be on the Town of Barnstable ecode Chapter 185. Draft permit regulations are available at

https://www.townofbarnstable.us/Departments/PublicWorks/Projects and Updates/Stormwater-Management-Regul

<u> As-built Drawings</u>	A	<u>s-b</u>	uilt	Dra	wings
---------------------------	---	------------	------	-----	-------

Below.	report on	the ni	umber d	of as-	built	drawings	received	during	this re	porting	period.
2000,,	Porton			.,	00000	00.00.000	,		,		P

Number of as-built drawings received: 21.000000

Optional: Enter any additional information relevant to the submission of as-built drawings:					

Street Design and Parking Lots Report

Below, describe any changes made or planned to be made to local regulations and guidelines based on the report completed in Year 4:

No changes to date.	To be determined pe	ending discussions	between various	departments.	Estimated June 30,
2027.					

Green Infrastructure Report

Below, describe progress towards making green infrastructure practices allowable based on the report completed in Year 4:

No changes to date.	To be determined	pending di	iscussions i	between	various	departments.	Estimated.	June 30
2027.								

Retrofit Properties Inventory

Below, list remaining permittee-owned properties that could be modified or retrofitted with BMPs to mitigate impervious areas (must maintain a minimum of 5 sites in inventory until less than 5 sites remain):

In order of impervious cover, the following properties are the top five that should be considered for BMP retrofit opportunities:

- -Barnstable High School
- -West Villages Elementary School and adjacent park area
- -Barnstable DPW
- -Barnstable Transfer Station and Recycling Center and adjacent areas

-Barnstable Intermediate School

As the Barnstable Municipal Airport is administered separately from the Town, this location is not currently 🖪

Below, list all properties that have been modified or retrofitted with BMPs to mitigate impervious area that were inventoried as part of 2.3.6.d of the permit and the type of BMP(s) implemented. Non-MS4 owned properties that have been modified or retrofitted with BMPs to mitigate impervious area may also be listed, but must be indicated as non-MS4.

Lovells Pond Boat Ramp - An existing structure near the Lovells Pond boat ramp was removed, resulting in removal of approximately 220 square feet of directly connected impervious surface. This area was retrofitted with native plantings and receives runoff from approximately 600 square feet of the boat ramp area. Total pollutant removals are estimated at 0.03 pounds of annual phosphorus reduction. This area serves as the required public demonstration project within the Lovells Pond watershed.

MCM6: Good Housekeeping

Catch Basin Cleaning

Below, report on the number of catch basins inspected and cleaned, along with the total volume of material removed from the catch basins during this reporting period.

Number of catch basins inspected: 1001.00000

Number of catch basins cleaned: 1537.0000000

Total volume or mass of material removed from all catch basins: 180.6900000 tons

Below, report on the total number of catch basins in the MS4 system.

Total number of catch basins: 5140.00000

If applicable:

Report on the actions taken if a catch basin sump is more than 50% full during two consecutive routine inspections/cleaning events:

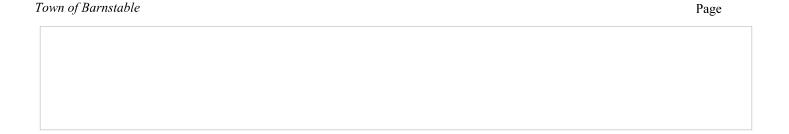

The Town does not weigh or measure material removed. Highway crews respond to work order requests to clean out basins and then hire out contractor services to clean basins. Also, note that the majority of catch basins are leaching structures and do not directly connect to the Town's regulated MS4 or Waters of the United States.

+

Street Sweeping

Report on street sweeping completed during this reporting period using one of the three metrics below.

Year 7

Activities Planned for Next Reporting Period

Please confirm that your SWMP has been, or will be, updated to comply with all applicable permit requirements including but not limited to the year 7 requirements summarized below. (Note: impaired waters and TMDL requirements are not listed below)

Yes, I agree✓

- Complete investigations of catchments associated with Problem Outfalls
- Complete investigations of catchments where any information gathered on the outfall/interconnection identifies sewer input

Annual Requirements

- Annual report submitted and available to the public
- Annual opportunity for public participation in review and implementation of SWMP
- Keep records relating to the permit available for 5 years and make available to the public
- Properly store and dispose of catch basin cleanings and street sweepings so they do not discharge to receiving waters
- Annual training to employees involved in IDDE program
- Update inventory of all known locations where SSOs have discharged to the MS4
- Continue public education and outreach program
- Update outfall and interconnection inventory and priority ranking and include data collected in connection with the dry weather screening and other relevant inspections conducted
- Implement IDDE program
- Review site plans of construction sites as part of the construction stormwater runoff control program
- Conduct site inspection of construction sites as necessary
- Inspect and maintain stormwater treatment structures
- Log catch basins cleaned or inspected
- Sweep all curbed streets at least annually
- Continue investigations of catchments associated with Problem Outfalls
- Implemented SWPPPs for all permittee owned or operated maintenance garages, public works yards, transfer stations, and other waste handling facilities
- Review inventory of all permittee owned facilities in the categories of parks and open space, buildings

and facilities, and vehicles and equipment; update if necessary

- Review O&M programs for all permittee owned facilities; update if necessary
- Implement all maintenance procedures for permittee owned facilities in accordance with O&M programs
- Implement program for MS4 infrastructure maintenance to reduce the discharge of pollutants
- Enclose all road salt storage piles or facilities and implemented winter road maintenance procedures to minimize the use of road salt

- Review as-built drawings for new and redevelopment to ensure compliance with post construction
 - bylaws, regulations, or regulatory mechanism consistent with permit requirements
- Inspect all permittee owned treatment structures (excluding catch basins)
- Identify additional permittee-owned properties that could potentially be modified or retrofitted with BMPs to reduce impervious areas so that the permittee maintains a minimum of 5 sites in their inventory, until such a time when the permittee has less than 5 sites remaining

Provide any additional details on activities planned for permit year 7 below:					

Part V: Certification of Small MS4 Annual Report 2023

40 CFR 144.32(d) Certification

I certify under penalty of law that this document and all attachments were prepared under my direction or supervision in accordance with a system designed to assure that qualified personnel properly gather and evaluate the information submitted. Based on my inquiry of the person or persons who manage the system, or those persons directly responsible for gathering the information, I certify that the information submitted is, to the best of my knowledge and belief, true, accurate, and complete. I am aware that there are significant penalties for submitting false information, including the possibility of fine and imprisonment for knowing violations.

Name:	Dan Santos	Title: DPW Director
	[Signatory may be a duly authorized representative]	Date: 9 27 24
